DETAILED ACTION

Allowable Subject Matter

1. Claims 6, 8, 12-13, and 15-17 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Iwasa et al. clearly teaches the construction of a multi-phase motor comprising:

a plurality of stator parts;

a plug part having plug pins with strip conductors for electrical connection to a power supply source;

a coil carrier for each of the a plurality of stator parts, the coil carrier having a winding wire connected directly to one of the plug pins;

an electrically insulating connecting piece extending between each coil carrier and each plug part and having a winding wire section;

each coil carrier being made integral with the respective electrically conductive connecting piece and the respective plug part; and

one plug part including passage openings for receipt of the plug pins of another plug part.

Kobayashi teach the construction of a stepping motor having a multiple lead wire configuration for the purpose of enabling the stators to be used as an annular motor having a center opening.

Best teach the construction of a connector arrangement connecting one of the plug pins and the strip conductors in a locking manner for the purpose of joining the cable ends of a stator winding of electric motors.

The prior art of record, taken alone or in combination, fails to teach the construction of a multi-phase motor for use with a power supply source as described on independent claim 17, comprising:

a first plurality of said plug pins being firmly attached in only one plug part and a second plurality of said plug pins being firmly attached in another plug part, said second plurality of plug pins also being removably retained in said one plug part;

each of the plurality of stator parts including a coil carrier having a winding wire connected directly to one of the plug pins; and

said one plug part including passage openings for receipt the second plurality of said plug pins of said another plug part.

Dependent claims 6, 8, 12-13, and 15-16 considered allowable by their dependence on allowed independent claim 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
